

Newsletter January-February

We started very well off into the new year. A new student from Germany joined our Community. We also have a new Outdoor teacher which is very nice! In the first week we went on a beautiful walk around a lake. There was a bit of snow and the lake was frozen so it looked very pretty! We also went to a very nice Cafe and had some hot chocolat. A visitor student from Slovakia joined us as well for three weeks.

We have a new manager of Production and Exchange and few days ago we had a market and sold a lot of our homemade honey. During the week a new student from California also joined our Community.

In our Outside work the last three weeks we were mainly working on cutting the trees which have fallen at our creek in pieces and we were sawing a lot, carrying wood up the hill and then also splinting the wood so we could use it for the stove in our schoolhouse for making fire. Now we have a very big pile of splinted wood which looks very nice!

Today we went on a walk on the frozen lake. It was beautiful and there was some snow so it looked very pretty. Luckily we had a lot of sunshine and nice weather. We walked quite a bit on the lake and we also went on the small islands in the lake :-). A lot of people were iceskating, doing crosscountry skiing or driving their four wheeler. It was very very nice!

Now we are expecting two guests from France which are going to stay at the farm for a week. Next week we have our presentations. This term everyone choose individual topics so we are going to present that:-)
